

## Hanging Your Personalized Sign

Our personalized signs have keyholes on the back for hanging your sign. The keyholes are 16" on center and 2" down from the top of the sign. We include two bear claw screws as well. Bear claw screws are double-headed anchorless screws that fit into the keyholes to hang your sign flush against the wall. These screws are self-drilling and do not require any drywall anchors and still hold up to 30 lbs. in drywall and 100 lbs. in studs which is more than enough to securely hold any of our signs.

Simply install the screws 16" apart until the first head is flush with the wall. Line the wide opening of the keyholes on the sign up so the second head slips into the keyhole and then pull down slightly so the head slides into the narrow opening to securely anchor your sign.

*Thank You,*
